

Dear colleagues and sponsors

Thank you for taking part in XII Conference of Serbian Biochemical Society.

We had three days of the state-of-the-art biochemistry with 23 lectures and 69 posters. The Conference was attended by over one hundred scientists from more than 10 countries. We were supported by the Ministry of Science, Technological Development and Innovation, ANSO Project 'PRESSION', Faculty of Chemistry, Serbian Academy of Science and Arts, Institute for Biological Research 'Siniša Stanković', Institute for Multidisciplinary Research, as well as by our commercial partners - Analysis, Kefo, and RTC.

This was not only an important international scientific conference, it was a rehearsal for the challenges that we will face in the future, including the maintenance of the international profile of the conference and the organization of large FEBS-supported meetings in Serbia.

See you next year, and please keep on with the good work in elucidating the secrets of life and forming the next generation of researchers.

Ivan Spasojevic

Chair of the Organizing Committee
